**ARX INFRA**  
BUILDING FUTURE CONSTRUCTING DREAMS

([www.arxinfra.com](http://www.arxinfra.com))

Presented by  
**ARX Team**

# The Team :

We don't just build to code; we build it to be remembered. When we leave a site, the structure should stand as a silent salesman for us for the next years as a symbol of our work.

**Mayur Madhab**  
**Founder and CEO**

Marketing and  
Construction

Concrete is rigid, but our business plan shouldn't be thus we stay firm on our values, but are flexible in our methods.

**Nazrul Hussain**  
**Founder and MD**

Operations and Field

Our value is measured by the weight of the stress we take off from client's shoulders. We try to be a partner in their vision, not just a line item in their expenses.

**Shakil Farzad**  
**Founder and MD**

Strategy and  
Finance

The difference between a 'house' and a 'masterpiece' is in the joints. Mastering the transition between wood, stone, and glass shows a level of craftsmanship that allows the architecture to truly speak.

**Arnab Baruah**  
**Founder and MD**

Architect and Design

# Our Roadmap

## **1. Strategic Consultation & Needs Assessment**

We begin with an in-depth discovery session to align with your vision. By analyzing your specific requirements and financial parameters, we ensure the project is grounded in reality from day one.

## **2. Value-Engineered Solutions**

Our team develops a comprehensive project strategy designed to maximize quality while strictly adhering to your budget. We focus on delivering premium results through efficient resource management and smart material selection.

## **3. Comprehensive Architectural & Structural Planning**

We provide detailed technical blueprints, including structural integrity reports and architectural layouts. This phase ensures that the design is not only beautiful but engineered for long-term safety and compliance.

## **4. Immersive 3D Visualization**

Before a single brick is laid, we offer high-fidelity 3D renderings. This allows you to visualize the final aesthetic and spatial flow, ensuring the finished product matches your expectations perfectly.

## **5. Formal Agreement & Mobilization**

Transparency is our priority. Once the design and budget are finalized to your complete satisfaction, we formalize the partnership with a clear agreement and immediately mobilize our team to begin construction
